

Anatomical ROI definitions

Twelve spherical regions in MNI space

A ROI locations on MNI anatomy

Representative bilateral sagittal, coronal and axial cuts

B Coordinates

Centers and radii

• Left hemisphere

ROI	MNI (x, y, z)	Radius
L STG Posterior	-58, -22, 4	8 mm
L STG Anterior	-54, 0, -8	8 mm
L MTG	-60, -38, 0	8 mm
L IFG Triangularis	-48, 24, 16	8 mm
L IFG Opercularis	-52, 12, 8	8 mm
L STS	-56, -32, 4	8 mm
L Heschl	-42, -22, 8	6 mm

• Right hemisphere

ROI	MNI (x, y, z)	Radius
R STG Posterior	58, -22, 4	8 mm
R STG Anterior	54, 0, -8	8 mm
R MTG	60, -38, 0	8 mm
R IFG	48, 24, 16	8 mm
R Heschl	42, -22, 8	6 mm

Spheres may overlap; overlapping ROI means are therefore not statistically independent.
